

SCREW COMPRESSORS

The Vulcan Range of silenced compressors are single stage oil injected air cooled rotary screw machines from 57cfm FAD to 1484cfm FAD at 7, 8, 10 & 12 bar pressure, 11 to 250kw.

All machines are self contained in heavy duty highly insulated cabinets producing as low as 63dB(A) noise levels. The entire package is designed to operate from -5°C to +45°C ambient temperature.

All units are individually factory tested to DIN-ISO standards and fitted with the world renowned GHH air end from Germany.

Control is by an advanced PLC - programmable logic controller
